

Air Seal and Insulation

In Preparation For "BPI REB- Whole House Air Leakage Controller" Exam

The IAST Training will prepare you to implement measures to tighten the building envelope to reduce energy loss from air leakage, as well as the introduction of pollutants and allergens through air migration. This course will also prepare you to improve thermal comfort and energy efficiency through the proper installation of dense-pack insulation materials. This class will conclude with BPI Certification tests.

Training Overview:

This is a 4 day course that includes hands on training. The class will cover approaches of whole house weatherization and installation techniques. Students will receive hands on training that will focus on areas of health and safety on the job site, air sealing, insulation placement, sealing ductwork, and using blower door guided air sealing techniques to effectively weatherize a dwelling. Students will also learn organization techniques including crew management, organization on the job, and effectively organizing trucks to improve quality and quantity.

Class Location: 102-10 159th Rd, 2nd floor, Howard Beach NY 11414

Class Fee: Training \$1,100. Field Exam \$650

Time: All class are 8:00am to 4:00 pm

Class Dates: March 12-16, 2018
